

CONTRACT PLANNING

Urban Planning Partners assists municipal governments with project management, policy and research analysis, land use and development regulations, negotiating development agreements, and updating General Plans, and Specific Plans. Our contract planning services include both on-site staffing and project-based assignments.

Urban Planning Partners takes on contract planning assignments with a fresh perspective. We understand the nuances of public agencies, and we are diligent at quickly getting a good understanding of the different codes, policies, and politics of all the agencies in which we work. As contract planners, we provide cost-efficient solutions to interim staff vacancies, technical expertise for special projects, and management of fluctuating workloads. Many of our planners have a background in public sector planning, which provides us with an excellent understanding of the inter-workings of public agencies, and a great appreciation for the demands placed upon agency staff.
